

**Review: Paul's Discovery of the Law of Evil, Rom 7:21a; Capacity for Blessings: Divine Good Compared with Human Good**

12. It becomes clear that only through knowledge of doctrine can the believer identify the presence of human good and evil within him. It is also apparent that only through doctrine can the believer become victorious over wheel-tracks of wickedness.
13. If it were not for the capacity that doctrine provides then blessings would distract us. They would disorient us from our top priority of spiritual advance.
14. The blessings of wealth, promotion, success, prosperity, and historical impact becomes a source of false security without the capacity doctrine provides to give them meaning and purpose.
15. Without doctrine the inner conflict tilts toward dominance by the first husband. Lucifer's plan is to counterfeit everything God proposes to do in grace.
16. Therefore, the fruits produced by the believer are classified according to the power behind their execution.
17. Works accomplished through God's system of grace, empowered by the Holy Spirit, and guided by biblical principles are classified as divine-good production.
18. Works accomplished through human energy, no matter the talent or ability involved, are classified as human- good production.
19. Yet it is human good that promotes the plan of Lucifer. But in order to control the thinking of the believer so he can manipulate the production of human good and evil, Lucifer must gain control of his soul.
20. It is personal sin that allows him to gain control. Therefore, the sinful nature is Lucifer's Fifth Column inside the body of the believer.
